WORK EXPERIENCE

MUNICIPALITY OF GASAN	July 2025 – October 2026
Computer Programmer I Gasan, Marinduque	
- Served as the sole developer from February 2026 to October 2026, managing ongoing system development and the project’s GitHub repository. - Designed the Gasan Citizen Portal’s layered Laravel backend using dependency injection and DTOs, with municipality-scoped records and access checks to support future expansion across municipalities. - Developed AICS beneficiary registration and household management workflows, including duplicate-record checks and identity verification. - Implemented assistance request processing from review and approval through disbursement preparation and release, with permission checks and rules governing each workflow stage. - Developed a Laravel Goods Distribution module to track inventory and goods issued to citizens, reusing household records from AICS registration to avoid duplicate household records within each municipality. - Developed a cemetery records module to manage cemetery information, maintain historical records, and track transfers. - Added database transactions, record locking, audit trails, and document-upload recovery to support consistent records, traceable changes, and reliable processing. - Managed application deployments on Laravel Cloud, maintaining separate production and testing environments to validate changes before releasing them to users. - Coordinated directly with office heads to clarify expected system behavior, investigate reported inconsistencies and bugs, and implement fixes, typically within one to two days.	
PROVINCIAL GOVERNMENT OF MARINDUQUE	January 2025 - June 2025

Administrative Aide III	
- Assisted with day-to-day system administration and supported staff using internal applications. - Provided technical support by troubleshooting user issues and assisting with computer and software concerns.	

CLOUD MANILA	February 2024 - May 2024
Intern	
Prepared XML files containing medicine information according to the required data structure.	

PROJECTS

GASAN CITIZEN PORTAL gasan.ph
Designed the backend architecture and developed municipal workflows for AICS, Cemetery, and Goods Distribution; integrated Laravel APIs with AGApp for community reporting, announcements, and events.
REBECCA LEE rebeccalee.com
Built a responsive personal-brand hub using React, TypeScript, Vite, and Tailwind CSS to connect Rebecca Lee’s projects and social profiles. Implemented SEO metadata, structured data, and a sitemap, and prepared the production static build for cPanel hosting.
THE SOBER SENSUALIST thesobersensualist.com
Built a responsive landing page using Next.js, TypeScript, and Tailwind CSS, featuring image galleries, retreat information, and a custom newsletter signup. Integrated MailerLite through a server-side API endpoint and implemented SEO metadata and structured data.

EDUCATION

MARINDUQUE STATE UNIVERSITY	2020 - 2024
Bachelor of Science in Information Technology	

TECHNICAL SKILLS

Backend: PHP, Laravel, Eloquent ORM, API development and integration
Frontend: React, Next.js, TypeScript, Tailwind CSS
Databases and architecture: MySQL, PostgreSQL, layered architecture, dependency injection, DTOs
Tools: Git, VS Code, pgAdmin, Laravel Herd, XAMPP, Vercel, Laravel Cloud
